RUNNING ORDER

The starting dog in the first series will be determined by using the last two digits at closing of the Toronto Stock Exchange (TSE) S&P/TSX composite index on the Thursday immediately preceding the trial.

(a) The starting dog will be the dog assigned the number in the draw that corresponds to the last two digits (including digits, if any to the right of the decimal point) of the closing

S&P/TSX composite index (the TSX number) on the Thursday immediately preceding the trial.

(c) If the TSX number is 00, the dog given number 1 in the draw shall be the starting dog for the first series.

(d) If the TSX number is greater than the number of dogs entered in the stake, the number of dogs entered in the stake will be subtracted from the TSX number and the resulting number (the Second TSX number) will determine the starting dog for the first series. The starting dog will be the dog assigned that Second TSX number in the draw.

(e) If the Second TSX number is still greater than the number of dogs entered in the stake the number of dogs entered in the stake will be subtracted from the Second TSX number. This subtraction process will be repeated as many times as is necessary until the number resulting from this subtraction corresponds with a number given in the draw to an entered dog. That dog will start the first series .
